<b>Patient Details:</b> XXXXXXX /52/F
<b>History:</b> Left Breast lump for 1 month No pain. No other significant history Known case of DM and HTN
<b>Available details:</b> Previous doctors evaluation shows a breast cancer suggesting an early cancer MMG: single left breast lump BIRADS 5 size 2*2 cm Biopsy: Ductal Carcinoma. IHC: ER +. PR -, Her 2+ PET CT (3/7/20 at Newmedd, Bangalore): No nodal mets. No distant metastasis
<b>Impression:</b> Early Breast Cancer ?cT2N0
<b>Plan:</b> I have discussed about this being early breast cancer. The blocks have to be sent for further testing. She requires surgery, the type of which (saving the breast or removing) can only be finalised after physical examination. The detailed plan will be discussed over video after physical consultation.
<b>Adv:</b> <ol style="list-style-type: none"><li>1. Patient to come for physical consultation. Mrs. XXXXXX mob: 9XXXXXXXXX to coordinate.</li><li>2. To send the blocks for FISH test.</li></ol>
